Majik DSM

A dedicated high performance one box solution
- just add speakers

INTERNAL USE ONLY

Majik DSM offers a powerful combination of network music player, pre-amp and power amp, all in a single box for an easy first step into authentic audiophile performance.

Offering higher performance audio, exciting new features and a fresh new look, this highly versatile and accessible network music player will have even greater appeal to both first-time hi-fi buyers seeking simplicity and authenticity, and existing customers seeking high-end hi-fi in more rooms.

Use Cases

- perfect starter living room system for new to HiFi customers
- ideal second room system for existing customers

Key points

- New DAC implementation derived from Katalyst, bespoke Class D power amplification and digital volume control
- All the analogue, digital and wireless connectivity required to connect all sources, from TV to turntable
 - 4 HDMI inputs make Majik DSM an ideal hub for all entertainment sources
 - Built-in MM hybrid analogue / digital phono stage architecture derived from Urika II
 - In-built WiFi for the highest quality wireless streaming with the convenience of no wires
 - Bluetooth for a simple way to get started playing music wirelessly
 - Type-B USB port to enables use as an audiophile quality standalone DAC
- New headphone amp designed to power high quality headphones
- Six customisable smart buttons offer immediate access directly from the product to pinned content
- Space Optimisation technology uniquely tailors performance to the individual room and speaker
- Complete the system with Majik LP12 and Majik 109 or 140 speakers for high performance streaming and vinyl playback throughout (personalisation available for speakers and LP12 plinths)
